

Maine Brings on Two for HIE

(1/18/2008)

[HealthInfoNet](#), Maine's new health information exchange, has retained [3M Health Information Systems](#) and Auckland, New Zealand's [Orion Health](#) to help in its construction.

This new network is designed to allow caregivers to efficiently access clinical information.

Organized as a public-private partnership, HealthInfoNet has received funding support from a wide range of private foundations, provider organizations and state and federal government agencies. More than \$4 million has now been raised for the project.
