

## Orion Health Announces Native Support for French, Providing Canadian Healthcare Organizations with Bilingual Access to Patient Data

*From the eHealth conference, Orion Health announces multilingual support in Concerto Physician Portal for English, French and Spanish languages*

Vancouver, BC ([PRWEB](#)) May 5, 2008 -- [eHealth Conference](#) -- [Orion Health](#), a leading provider of clinical workflow and integration technology for the healthcare sector, announces multilingual support in Concerto Physician Portal for English, French and Spanish languages.

The new [Concerto Portal](#) release has been developed to support solutions that need to present information in more than one language, allowing physicians to personalize their experience by choosing which language data is presented in at any time while using the system.

"Concerto's new support for French ensures that patient information can be accessed by physicians and staff in the language of their choice," said Michael Craig, Vice President, Sales, Orion Health North America from Vancouver's eHealth conference.

Switching from one language to another is seamless and is achieved with a single click. Both static and configuration text is translated, along with user assistance and clinical user manuals. Training will also be presented in the users preferred language.

cResults Viewer, a Web-based application providing clinicians with instant online access to a patient's laboratory and radiology reports, will also support multilingual operation immediately. Other Concerto Portal applications will move to use the new multilingual framework soon.

The Concerto Portal provides a universal, easy to use solution that delivers accurate patient information and results where and when clinical staff needs it to increase diagnostic accuracy, improve patient safety and reduce costs.

Orion Health's Concerto Portal Delivers:

- Single Complete Source of Information
- Reduced Workloads and Costs
- Improved Physician and Patient Satisfaction
- Rapid Physician Adoption
- More for Your Money
- Enterprise Wide Information Foundation

Layering on top of existing data structures, a unified view portal solution can provide single view capabilities for physicians, providing simplified, real-time access to a selected patient's clinical information, wherever it may reside.

Orion Health's clinical information software meets the information needs of clinical staff and healthcare managers, delivering secure, universal access to healthcare information and helping healthcare providers proactively manage and coordinate patient care across the community. Orion Health's integration and messaging products streamline the exchange of healthcare data within organizations and between business partners.

Integrating healthcare systems throughout the world since 1993, Orion Health contributes to integration and clinical workflow projects across the globe for clients including Abbott Laboratories, New York State Department of Health, Capital Health, University Hospitals of Leicester NHS Trust, and the New Zealand Ministry of Health.

About Orion Health

Orion Health's easy-to-use solutions and applications improve patient care and clinical decision making by providing integrated health data in a single, unified view. By enhancing existing healthcare information systems, Orion Health's Rhapsody integration engine, Concerto physician portal, and workflow solutions provide healthcare workers with easy access to patient data and trends, and reduce errors and omissions by streamlining information transfer.

Worldwide, Orion Health is implementing health information communities involving over 35 million patients with tens of thousands of active users including Maine's HealthInfoNet and the Vermont Health Information Exchange. Orion Health's partners include leading health system integrators and IT vendors such as Accenture, IBM, Oracle Corporation, Sierra Systems, Xwave and others. Orion Health has more than 1,000 clients around the world, including Lahey Clinic, New York State Department of Health, UCLA Medical Center, and U.S. Centers for Disease Control and Prevention (CDC).
